

So quiet you can hear their jaws drop.

The XR™ Reamer.

**For vibration control, it's the XR reamer—
from Halliburton Drill Bits and Services.**

The XR™ reamer is a major reamer breakthrough. There's superior vibration mitigation. The unequalled ability to enlarge a pilot hole up to 44% while drilling. Smooth rotation and circulation out of the hole. Self-body stabilization, thanks to tight toleranced, innovative stabilization pads. And much, much more.
