

**In highly inclined beds, we don't just point you in the right direction.**

**>> We get you there, too.**

**F**or drillers confronted with highly inclined formations where staying vertical is a challenge, V-Pilot system from Sperry Drilling services is *the* solution. An extremely reliable, self-correcting vertical drilling solution with an integrated high-output mud motor, this purely hydromechanical tool has no electronics—making it well suited to hard rock drilling. And it's fast. The V-Pilot system's unique engineering eliminates the slow penetration rates of conventional motors.

Whatever your drilling challenge—vertical, horizontal, harsh environment or extreme extended-reach—Halliburton has the solution. To learn more about how we are setting direction with the Pilot™ fleet, check out our **Geo-Pilot®**, **Geo-Pilot® XL**, **Geo-Pilot® GXT**, **EZ-Pilot®** and **V-Pilot®** systems at [www.halliburton.com/pilot](http://www.halliburton.com/pilot).
