

Halliburton 2017 Fact Sheet

Overview

Halliburton is one of the world's largest providers of products and services to the energy industry, serving the oil and gas sector throughout the lifecycle of the reservoir. Whether we're locating hydrocarbons, managing geological data, drilling and evaluating formations, constructing and completing wells, optimizing production, or intervening to tame a turbulent well, we're dedicated to partnering with clients to understand their needs and safely deliver efficient, cost-effective solutions.

Halliburton comprises 14 product service lines (PSL) structured according to Global Business Lines divided into three areas: Drilling and Evaluation; Completion and Production; and Landmark & Halliburton Digital Solutions.

Spearheading our integrated services, Consulting & Project Management supports all PSLs, bringing together the talent and technologies of the entire company.
