

GEO 2018

6-8 March > Bahrain > Booth 821

Tuesday, 6 March

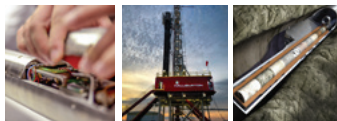

- 10:00** Capture 100% of Your Reservoir Fluids with the CoreVault® System
-
- 10:30** Enhance Hydraulic Fracture Placement with Cost-effective Formation Evaluation
-
- 11:00** Neftex Insights: Stratigraphic and Unconventional Exploration Plays, Opportunities and Risks
-
- 11:30** Reduce your learning curve and enhance asset value with Integrated Sensor Diagnostics
-
- 13:30** Leveraging the OpenEarth™ Community to Accelerate Software Development
-
- 14:00** Increase Production In Mature Fields with Halliburton Artificial Lift and Summit ESP
-
- 14:30** High Resolution Geomodeling with powerful analytics to Interrogate Data and Reduce Uncertainties
-
- 15:00** Optimizing Big Data for Next Generation Geosciences – Challenges and Opportunities
-
- 15:30** Acquire Real-Time Answers with the ICE Core® Advanced Downhole Fluid Analyzer
-
- 16:00** Providing Cloud-Enabled Seismic Attribute Generation, Parameter Optimization, and Visualization for Assisted Fault Interpretation

Wednesday, 7 March

- 10:00** Efficient Drilling Solutions for Deep and Harsh Environments
-
- 10:30** Providing Cloud-Enabled Seismic Attribute Generation, Parameter Optimization, and Visualization for Assisted Fault Interpretation
-
- 11:00** Capture 100% of Your Reservoir Fluids with the CoreVault® System
-
- 11:30** Reduce your learning curve and enhance asset value with Integrated Sensor Diagnostics
-
- 13:30** Optimizing Big Data for Next Generation Geosciences – Challenges and Opportunities
-
- 14:00** Leveraging the OpenEarth™ Community to Accelerate Software Development
-
- 14:30** Delivering Predictable Well Construction through Integrated Project Management
-
- 15:00** Neftex Insights: Stratigraphic and Unconventional Exploration Plays, Opportunities and Risks
-
- 15:30** Integrating Digital and Physical Rock Analysis for Conventional Reservoirs
-
- 16:00** Enhance Hydraulic Fracture Placement with Cost-effective Formation Evaluation

GEO 2018

6-8 March > Bahrain > Booth 821

Thursday, 8 March

- 10:00** Delivering Predictable Well Construction through Integrated Project Management
- 10:30** Increase Production In Mature Fields with Halliburton Artificial Lift and Summit ESP
- 11:00** Leveraging the OpenEarth™ Community to Accelerate Software Development
- 11:30** Integrating Digital and Physical Rock Analysis for Conventional Reservoirs
- 13:30** Efficient Drilling Solutions for Deep and Harsh Environments
- 14:00** Acquire Real-Time Answers with the ICE Core® Advanced Downhole Fluid Analyzer
- 14:30** High Resolution Geomodeling with powerful analytics to Interrogate Data and Reduce Uncertainties
