

OTC 2018

April 30 – May 3 > Houston, Texas > Booth 439

Monday, April 30

- 10:30** Driving Performance Through Service Integration in Brazil's Largest Ultra-Deepwater Pre-Salt Field
- 11:30** Increasing Drilling Efficiency with the JetPulse™ High-Speed Telemetry Service
- 1:30** Enabling Automated Managed Pressure Control from Drilling to Completion with the GeoBalance® MPD System
- 2:00** Applying Digital Transformation in Offshore Operations, Using the Voice of the Oilfield™ Solution
- 2:30** Enhancing Reservoir Understanding in Large-Diameter Deepwater Boreholes with the ALD™ Azimuthal Lithodensity Service
- 3:00** Optimizing Production with Intelligent Completions to Manage Multizone Reservoirs
- 3:30** Increasing Bit Footage While Maintaining Efficiency with the Stega™ Efficient Cutter Layout Technique
- 4:00** Creating Synergies that Drive Efficiency and Lower Costs in the Gulf of Mexico

Tuesday, May 1

- 10:00** Increasing Drilling Efficiency with the JetPulse™ High-Speed Telemetry Service
- 10:30** Drilling Slimmer Holes While Addressing Low-Rheology Needs in Wells with ECD Challenges
- 11:00** Increasing Efficiency and Reliability of Offshore Lightweight Cementing
- 11:30** Increasing Bit Footage While Maintaining Efficiency with the Stega™ Efficient Cutter Layout Technique
- 1:30** Transforming Well Construction and Delivery Through Digital Twins
- 2:00** Enabling Fast and Accurate Decision Making in Deepwater Wells with the XSpace™ Data Management Platform
- 2:30** Providing Higher-Quality Pressure and Gradient Data in Challenging Wells with the RDT™ Dual-EPS Solution
- 3:00** Minimizing Risk and Increasing Efficiency for Well Intervention Operations with New Conveyance Technology
- 3:30** Profiling and Locating Pipeline and Wellbore Deposits with InnerVue™ Pressure Wave Analysis
- 4:00** Responding Rapidly to Mitigate the Effects of Subsea Source Control Incidents By Using the Global Rapid Intervention Package (GRIPSM)

OTC 2018

April 30 – May 3 > Houston, Texas > Booth 439

Wednesday, May 2

- 10:00** Applying Digital Transformation in Offshore Operations, Using the Voice of the Oilfield™ Solution
- 10:30** Providing Higher-Quality Pressure and Gradient Data in Challenging Wells with the RDT™ Dual-EPS Solution
- 11:00** Responding Rapidly to Mitigate the Effects of Subsea Source Control Incidents By Using the Global Rapid Intervention Package (GRIPSM)
- 11:30** Profiling and Locating Pipeline and Wellbore Deposits with InnerVue™ Pressure Wave Analysis
- 1:30** Enabling Automated Managed Pressure Control from Drilling to Completion with the GeoBalance® MPD System
- 2:00** Optimizing Production with Intelligent Completions to Manage Multizone Reservoirs
- 2:30** Drilling Slimmer Holes While Addressing Low-Rheology Needs in Wells with ECD Challenges
- 3:00** Increasing Efficiency and Reliability of Offshore Lightweight Cementing
- 3:30** Enhancing Reservoir Understanding in Large-Diameter Deepwater Boreholes with the ALD™ Azimuthal Lithodensity Service
- 4:00** Driving Performance Through Service Integration in Brazil's Largest Ultra-Deepwater Pre-Salt Field

Thursday, May 3

- 10:00** Creating Synergies that Drive Efficiency and Lower Costs in the Gulf of Mexico
- 10:30** Transforming Well Construction and Delivery Through Digital Twins
- 11:00** Minimizing Risk and Increasing Efficiency for Well Intervention Operations with New Conveyance Technology
- 11:30** Enabling Fast and Accurate Decision Making in Deepwater Wells with the XSpace™ Data Management Platform
