

Go Further, Faster™

Take your career further.
Develop your skills faster.

HALLIBURTON

Imagine

beginning your career with an organization that offers unique challenges, creative solutions, innovative training and endless opportunities.

Go Further, Faster™
Put your energy services career in the
..... **fast lane.**

Halliburton is  **NOT** an oil company.

But we do play a critical role
in the energy industry.

We are an energy services company.

The people and the technologies...

As one of the world's largest and most well-known energy services companies, we supply the expertise, advanced technologies and innovative solutions necessary to economically and environmentally drill, evaluate, access, produce and maintain our customers' oil and natural gas wells.

Halliburton serves the life cycle of the oil well. Using the latest geological technologies, we create data that helps our customers locate oil and natural gas.

When hydrocarbons are located, we provide solutions to determine if oil and gas can be produced.

If a well is determined to be viable, then we begin production. Throughout the life of the field, we help ensure that our customers get optimal production rates.

All of the services we provide help our customers meet the world's demand for energy.

...to meet a global demand.

As energy resources become increasingly harder to locate and access, developing new and better technologies to perform these tasks is the key to surpassing our customers' expectations. To encourage and promote innovation, we rely on a global network of state-of-the-art technology centers in Belgium, Canada, India, Singapore, the U.K. and the U.S. to provide innovative technology solutions that bring exceptional value to our customers.

We currently hold more than 4,000 active patents and we are committed to the continued development of technological solutions that can impact the industry and the world.

Another way that we're using technology to stay ahead of the curve is with the development of the Digital Asset®, Halliburton's real-time collaborative, open environment in which we model, measure and optimize the customer's asset.

Using this powerful solution, we are able to cover more ground; work in complex environments; develop unconventional hydrocarbons, including heavy oil, economically; and exploit smaller accumulations more efficiently.

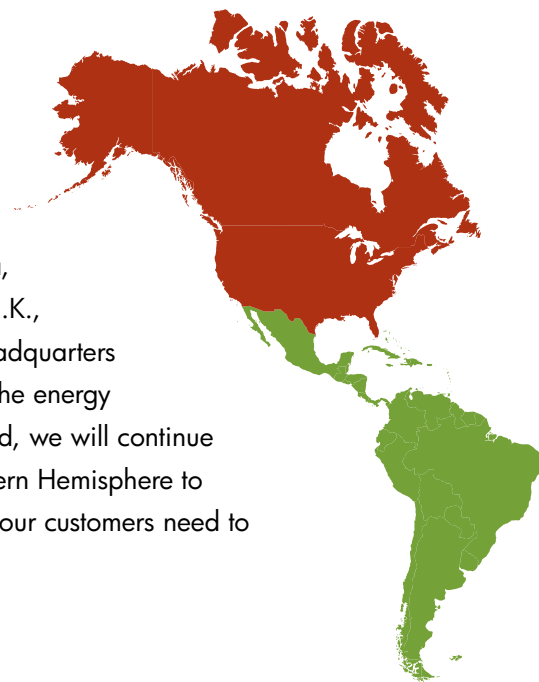

..... Are you ready to take on these challenges?

Global opportunities.

..... We go where our customers go.

That's why we do business in approximately 70 countries, and have major operations in Algeria, Angola, Argentina, Australia, Brazil, Canada, China, Egypt, Indonesia, Mexico, Nigeria, Norway, Oman, Russia, Saudi Arabia, Thailand, United Arab Emirates, the U.K., the U.S. and Venezuela. We have headquarters in both Houston and Dubai. And, as the energy business continues to expand eastward, we will continue to strengthen our presence in the Eastern Hemisphere to provide the people and solutions that our customers need to succeed.

Like our dynamic industry, we are fully global, with more than 50,000 employees from 121 different countries, working on six of the seven continents and on the oceans in between.

This type of global presence enables us to offer you global opportunities as you progress in your career. From working with colleagues who are from every corner of the globe, to traveling to different parts of the world, to living and working in different countries, the possibilities for your career with Halliburton are endless.

Delivering Excellence

Halliburton divisions and product service lines.

We deliver services to our customers through two divisions: Drilling and Evaluation, and Completion and Production. Each segment is composed of several groups called product service lines that offer a broad array of technologies and services to upstream oil and gas customers worldwide.

Drilling and Evaluation provides field and reservoir modeling, drilling, evaluation and precise wellbore placement solutions that enable customers to model, measure and optimize their well construction activities. This segment consists of the following product service lines:

- Baroid
- Sperry Drilling
- Drill Bits and Services
- Wireline and Perforating
- Software and Asset Solutions
- Testing and Subsea

Completion and Production delivers cementing, stimulation, intervention and completion services to Halliburton customers. The product service lines that make up this segment are:

- Production Enhancement
- Completion Tools
- Cementing

Support services.

While our product service lines are working closely with our customers to ensure that their needs are met, our global team of support service groups is ensuring that our products are effectively marketed and sold, and that our IT infrastructure is up and running, our finances are healthy, and that our goods are efficiently manufactured and transported around the globe.

Each support services group offers outstanding career opportunities for people with the drive and talent to handle a unique career in a dynamic industry.

Here's a brief description of some of our support services and how each fits into Halliburton:

Business Development and Marketing.

Business Development works closely with our customers and with our product service lines to offer the best Halliburton solutions for our customers' biggest challenges.

Business Development also offers select new hires the opportunity to participate in the Field Associate Program.

The program provides a broad operational view of Halliburton's product service line offerings, and has the specific goal of providing the trainee with a working knowledge of the processes, basic job procedures, operational factors, personnel functions and customer responses at the point of delivery. Once the 18–24 month rotational program is completed, trainees have the opportunity to advance into positions within our Sales and Operations departments.

Our Central Marketing group plans, produces and delivers innovative, high-impact marketing campaigns, print and online collateral, and events that align with the Company's strategic objectives.

Corporate Affairs.

Corporate Affairs helps to build relationships between Halliburton and various stakeholders, including our employees, our customers and the communities in which we operate. The group consists of three primary departments – Community Relations, Employee Communications and Public Relations:

- Community Relations strives to improve the quality of life in communities where Halliburton operates through financial contributions, employee giving and employee volunteering.
- Employee Communications creates and delivers professional print, online and multimedia communications to Halliburton employees.
- Public Relations interacts with the media and helps to preserve and manage Halliburton's reputation and image with stakeholders.

Finance.

Halliburton's Finance group offers relevant, value-added financial guidance and insight to ensure that our business goals are met in a financially responsible manner. Finance manages a broad range of business and financial issues that enable our internal clients to make critical business decisions. Major functions of the Finance group include:

- Financial Reporting
- Consolidations
- Manufacturing Accounting
- Corporate Accounting
- Financial Planning and Analysis
- Financial Controls
- Audit Services
- Treasury
- Investor Relations
- Division/Region Finance and Accounting
- Tax Compliance, Reporting and Transactions
- Tax Global Operations and Planning

The Finance group's Accounting Rotation Program enables select new hires to spend their first eight weeks rotating through four or five Accounting functions. This rotation enables participants to gain a better understanding of the various departments and learn how each functions within the Company, and to gain exposure to some of the numerous opportunities available within Finance.

Human Resources.

Human Resources recruits new employees and provides current employees such opportunities as training, career development, benefits and other resources to help them work well and live well as a member of the Halliburton team.

Major departments in the Human Resources group include:

- Talent Acquisition
- Training
- Benefits
- Compensation
- Employee Relations
- Human Resource Information Systems
- International Human Resources
- Generalist

Health, Safety, Environment and Operational Excellence.

At Halliburton, our goal is to safely exceed the expectations of our customers. The well-being of our employees, contractors, customers and the communities in which we operate are of primary concern in everything we do. Halliburton's Health, Safety, Environment (HSE) and Operational Excellence group drives improvements in HSE and service delivery through a sustainable focus on efficiency. We define efficiency as quality, cost and lead time. These improvements promote safer working environments for employees and service delivery excellence which yields increased recognition as an industry leader.

Information Technology.

Halliburton's Information Technology (IT) support footprint spans all of Halliburton's product service lines, support functions and regions. The IT group supports internal operations and lends direct support to Halliburton's customers for a number of services.

The IT organization consists of six major functions:

- Infrastructure Services
- Application Services
- Project Services
- Global Services
- Finance and Administration
- Division/Supply Chain Customer Relationship Management

Collectively, these functions manage the direction, development, supply and global support of IT services for the Company.

Law.

The Law Department provides legal support to Halliburton's worldwide business activities. With more than 65 lawyers resident in offices around the world, the Law Department represents the Company's legal interests in all jurisdictions and with regard to all issues. The Law Department is made up of the following practice areas:

- Code of Business Conduct
- Commercial
- Corporate Governance
- Employment
- Environmental/Real Estate
- Intellectual Property
- International Trade Compliance
- Government Relations
- Legal Business Services
- Litigation
- Public Law
- Records and Information Management

Supply Chain.

Supply Chain Management is the largest support group within Halliburton. This team of global professionals is responsible for procuring, handling, managing, manufacturing and transporting materials and finished goods to both internal and external customers to our locations around the world.

The Supply Chain organization is made up of four major groups: Manufacturing, Procurement, Materials and Logistics. All play a critical role in implementing strategies to ensure that the goods are at the right locations, at the right time, in the proper quantity and at an acceptable cost.

Supply Chain offers very select new graduates an opportunity to participate in the Supply Chain Management Program (SCMP). This innovative 2½-year program gives participants the opportunity to rotate through five six-month assignments in different Supply Chain functional groups across the globe. The SCMP candidates are given high-value, high-impact projects to provide them with broad exposure to Halliburton's \$4 billion Supply Chain organization. This program puts graduates on the fast track to leadership roles within Halliburton and international assignment opportunities.

Technology.

Halliburton's Technology group, responsible for research and development, helps us remain at the forefront of innovation, as a leader in the upstream oil and gas service industry.

Recognized worldwide for developing some of the industry's most cutting-edge technologies and solutions, the group works on high-visibility, high-priority, high-value projects that significantly impact the revenue and profitability of the Company.

Halliburton holds more than 4,000 patents worldwide and invests approximately \$230 million each year developing new technologies for tomorrow's energy needs.

Comprehensive training.

At Halliburton, we believe that going further, faster in your career begins with helping you develop the skills you need to succeed. That's why, throughout your tenure with Halliburton, we'll provide you with extensive training and educational opportunities, along with numerous tools and resources, to help you multiply and expand your competencies and to develop your career.

Some of the highlights of our learning and development opportunities include:

- The **I Learn™** online training management system, which offers more than 3,700 active courses to assist employees in their professional and personal development
- The **Halliburton Educational Assistance Program**, which, where applicable, pays for, or reimburses a portion of fees to, job-related workshops, offsite seminars, courses taken at accredited educational institutions and other programs targeted to improve your skills and performance
- **Comprehensive career development programs** that enable new graduates to receive comprehensive, hands-on training and mentoring in their areas of employment.

Halliburton's commitment to education and development has helped us to build one of the strongest, most sought-after teams in the energy industry.

At Halliburton, we give you the tools to help you go further in your career and to do so faster than you imagined possible. We offer you meaningful work that impacts the Company's success, and supplement it with numerous learning and development opportunities to help you build the competencies and expertise you need to have a successful career and top it off with plenty of opportunities.

With our worldwide presence, we strongly encourage you to chart your path for career advancement by taking advantage of the numerous opportunities for growth and development in different areas of the Company, and in locations around the globe.

Are you ready to be part of the next generation of Halliburton leaders? Are you ready to help keep us at the forefront of innovation? We're looking for people who want the challenging work and deep rewards that are a part of Halliburton's culture.

If you're interested in becoming a member of our team, log on to www.halliburton.com/careers to apply – or, to learn more about your career choices at Halliburton, please go to www.gohalliburton.com.

Career advancement.
