

Landmark

Fact Sheet

Global overview

Value proposition:

Lifecycle insights derived from an oil and gas digital twin enabled by an open community, industry platform to lower cost per BOE

Brief description of PSL:

- Inspires, develops and applies cutting-edge, scientific thought leadership within the E&P industry
- Provides deep insights to the E&P industry through the integration of data and digital technologies.
- Provides digital, cloud enabled E&P transformation solutions across the industry lifecycles

Key Points:

- Offers an end-to-end suite of digital solutions which span the entire lifecycle of the well, from exploration to abandonment
- A leader in the digital transformation of the oil and gas industry
- Leading cloud-based technology solutions designed specifically for E&P customers
- Integrates workflows across multiple technologies and domains, combining superior domain knowledge with cutting-edge analytics
- Focused on the analytical evolution of the E&P lifecycle for customers and offering a superior customer experience

Global Presence:

- 44 of the top 50 E&P companies use Landmark project data management software
- Landmark technology solutions are used in 68 percent of Gulf of Mexico discoveries, and 70 percent of the world's deepwater projects greater than 1,000 feet

A Few Key Technologies:

- iEnergy® Cloud
- DecisionSpace® 365
- Global Earth Model
- Well Construction 4.0
- Voice of the Oilfield™
