

# Halliburton Production Enhancement

## Fact Sheet

### Global overview

#### Value proposition:

Engineered stimulation solutions to maximize recovery and efficiency for our customers.

#### About Production Enhancement:

- Unconventional fracturing, acidizing services
- Conventional stimulation and fracturing services
- Pinnacle Microseismic and Fiber Optic services
- Offshore vessel services
- Acidizing materials and services
- Sand control materials and services
- Conformance (water control) materials and services
- Gas (CO<sub>2</sub> and N<sub>2</sub>) services

#### Key points:

- Global leader in unconventional fracturing and acidizing
- Leader in safe and efficient fracturing operations
- Comprehensive portfolio of technologies, capabilities, and experience
- Deep experience in every type of environment, formation, and reservoir
- State-of-the-art stimulation vessels with operational and technical experience in most offshore markets
- Design and manufacture fracturing equipment

#### Global Presence

- Market share leader in most unconventional fracturing markets
- Operations in over 65 countries
- Four technology centers around the world supporting technology development
- Duncan, Oklahoma manufacturing facility

#### A Few Key Technologies

- Prodigy™ Intelligent Stimulation Services
- MicroScout® and MicroScout® Plus Services
- ExpressKinect™ Wellhead Connection Unit
- ExpressSand Containerized Sand System
- EquiSeal™ Conformance Service
- AccessFrac® and AccessAcid™ Services
- StimWatch® Service
- FiberPoint™ Service
- Transcend™ Permeability Enhancers

#### Recent case studies

- [MicroScout® Service Enhances Well Production in Woodford Shale Play](#)
- [Customized Chemistry Improves Well Performance](#)
- [AccessFrac® Stimulation Service Increases Well Production](#)
- [StimWatch® Stimulation Monitoring Service Optimizes Acid Stimulation](#)
