BARACOR® 700E corrosion inhibitor is specifically designed to prevent oxygen corrosion in monovalent brines, aerated drilling fluids, and air rich drilling fluid systems such as mist or foam drilling applications. BARACOR 700E corrosion inhibitor helps prevent oxygen pitting and protect drillpipe, casing, and other downhole tubulars. It is specially formulated for use in the North Sea.

**Product Description**

- Helps to protect drillpipe, casing and stainless steel tubing

**Applications / Functions**

- Reduces corrosion rates in monovalent brines significantly
- Compatible with all monovalent brine types
- Does not affect drilling fluid properties

**Advantages**

- Reduces corrosion rates in monovalent brines significantly
- Compatible with all monovalent brine types
- Does not affect drilling fluid properties

**Typical Properties**

- **Appearance**: Yellow to brown liquid
- **Specific Gravity**: 1.339 to 1.363
- **pH (neat)**: 7.5 to 8.5

**Recommended Treatment**

Add 0.5 – 1.5 lb/bbl (1.4 – 4.3 kg/m3) of BARACOR 700E corrosion inhibitor directly to the system

**Packaging**

BARACOR 700E corrosion inhibitor is packaged in 272-kg drums
