

BROMI-VIS®

Viscosifier

Product Data Sheet

Product Description

BROMI-VIS® viscosifier is used to viscosify high density brines including bromide brines. BROMI-VIS viscosifier is a liquid organic product that mixes easily in all brines, is acid soluble, and contains no petroleum hydrocarbons that may cause sheening. BROMI-VIS viscosifier can also be used to prepare a spacer for displacement, clean the hole while milling, and minimize the loss of brine into the formation.

Applications / Functions

- Clean the hole while milling or underreaming
- Viscosify brines used for gravel packing
- Helps minimize loss of brine into the formation
- Prepare spacer for displacement

Advantages

- Mixes easily in all brines
- Helps develop a smooth uniform viscosity with no lumping
- Helps minimize formation damage
- Acid soluble
- Helps control fluid loss
- Contains no petroleum hydrocarbons that may cause sheening
- Helps viscosify bromide brines

Typical Properties

- | | |
|--------------------|----------------------|
| • Appearance | Off-white suspension |
| • Flash point | 155°F |
| • Flash point | 68°C |
| • Pour point | 35°F |
| • Pour point | 1.7°C |
| • Specific gravity | 1.04 |

Recommended Treatment

Mix 0.2 to 2.0 gal/bbl (0.48-47.6 l/m³) of BROMI-VIS viscosifier to brine using a mixing hopper if available.

Packaging

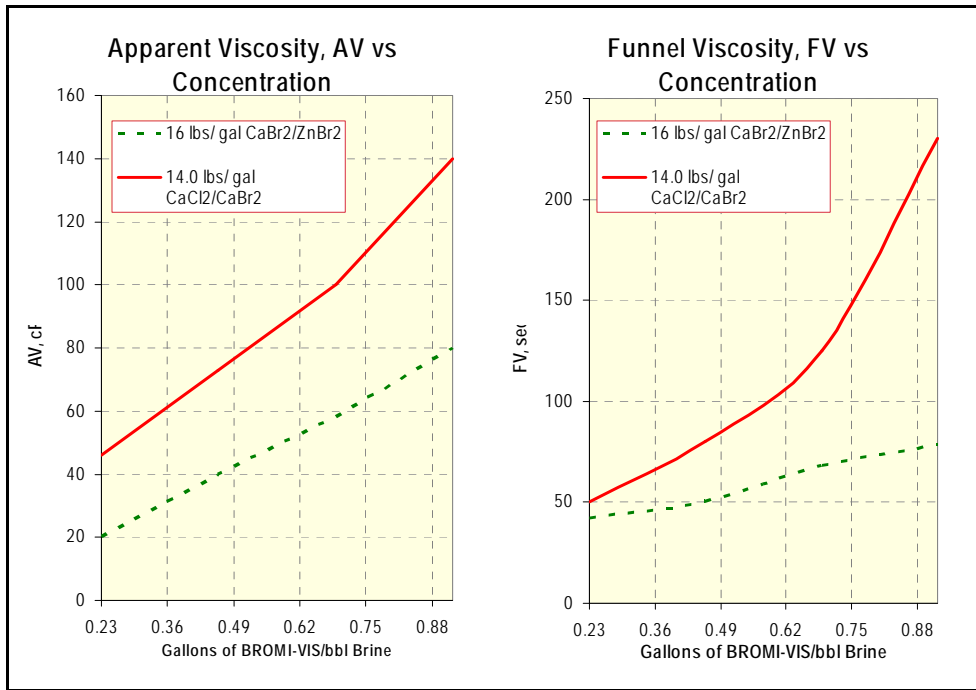

BROMI-VIS viscosifier is available in 5-gal (18.9-l) pails containing 43-lb (20-kg) net weight. Store in a cool dry area.
