

EZ GLIDE™

Lubricant

Product Data Sheet

Product Description

EZ GLIDE™ lubricant is a blend of surfactants and non-hydrocarbon lubricants that is used to reduce torque and drag in water based fluids including brines and is suitable for use up to 300°F (149°C). EZ GLIDE lubricant will not cause oil-wetting of weighting agents and is a good choice for high density fluids and ERD applications. EZ GLIDE lubricant also mixes well with EP MUDLUBE® lubricant for increased lubricity.

Applications / Functions

- Helps reduce lubricity coefficient
- Helps reduce torque
- Helps reduce drag
- Helps reduce bit balling

Advantages

- Contains no petroleum hydrocarbons
- Minimal effect on rheological properties
- Will not oil-wet weighting agents
- Minimal impact on return permeability

Typical Properties

- | | |
|-------------------------------------|------------|
| • Specific gravity, @ 68 °F (20 °C) | 0.93 |
| • Flash point, COC > | 248°F |
| • Flash point, COC > | 120°C |
| • Solubility in water, Insoluble | |
| • Pour point | 20 to 40°F |
| • Pour point | -7 to 4°C |

Recommended Treatment

Add 2% to 7% by volume directly to the system

Packaging

EZ GLIDE lubricant is packaged in 55-gal (208-l) drums containing 426-lb (193-kg) net weight. Also available in bulk.
