

WALL-NUT®

Lost Circulation Material

Product Data Sheet

Product Description

WALL-NUT® ground walnut shells are used to help combat lost circulation in water-based and non-aqueous fluids. WALL-NUT lost circulation material is available in three grades: fine, medium, and coarse. All three grades may be used in pills for spotting opposite thief zones and in high filtration squeeze slurries. WALL-NUT lost circulation material can be used in the active mud system to help prevent lost returns.

Applications / Functions

- Helps stop or reduce the occurrence of lost circulation
- Helps remove sticky clays from the bottomhole assembly

Advantages

- High strength
- Is compatible with other lost circulation materials
- Size can be matched with the type of lost circulation encountered

Typical Properties

- Appearance Coarse, granular material
- Dry Screen Analysis, See table

Recommended Treatment

Add 10-40 lb/bbl (28.5-114.1 kg/m³).

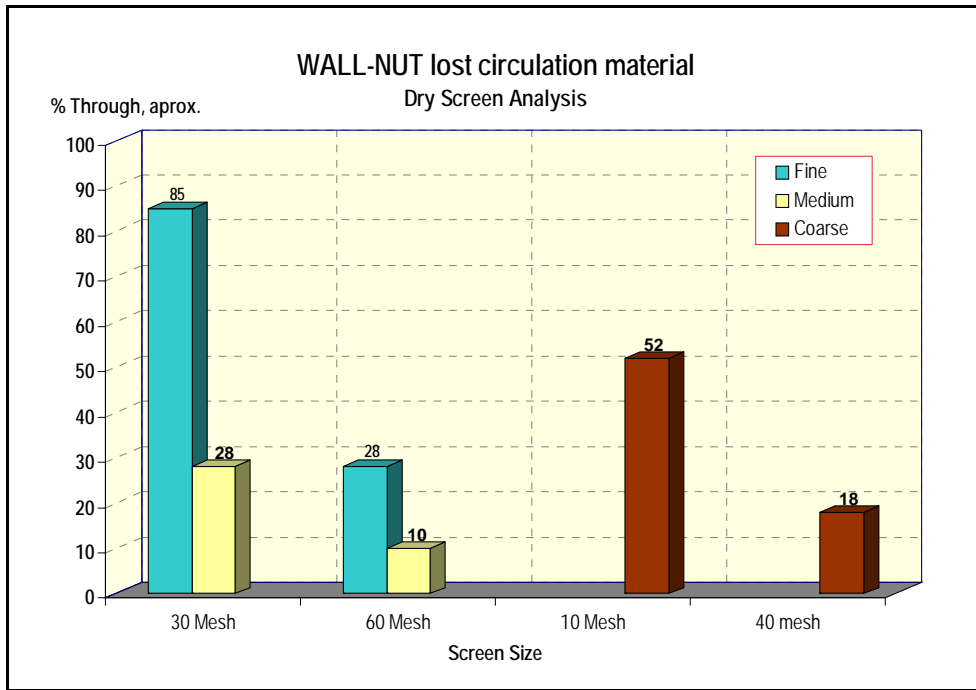

Packaging

WALL-NUT lost circulation material fine, medium, and coarse are packaged in 50-lb (22.7-kg) sacks.
