V30/V38K Coil Tubing Injector

The 30 and 38K units have the capacity for most common coiled tubing requirements offering a maximum continuous pull of 24,000 and 30,400 lb respectively. The units are available in various configurations including trailer-mounted, truck-mounted split bodyloads or offshore skid-mounted units. Features include hoist capacity (pull rating) to 30,000 or 38,000 lb (depending on injector hydraulic motors), 2 9/16-in. 10,000 psi, H2S-rated stripper, and 2 9/16-in. 10,000 psi, H2S-rated quad blowout preventer. This unit also adapts easily to larger rental blowout preventers (BOP).
