With Tuned Cementing Solutions™ systems, Halliburton has created a set of innovative fit-for-purpose solutions with the flexibility required to allow each system to be tuned specifically for a given set of wellbore conditions. Arctic Cements form one of these families of fit-for-purpose solutions.

With Arctic Cements you receive a conventional cementing solution designed to solve a number of cold weather issues using specially tuned systems. Arctic Cements are designed to set up in temperatures below the range of normal cements, provide superior insulation, and/or protect permafrost.

Arctic Cem™ Cement
Designed to solve a number of cold weather issues

Tuned Cementing Solutions tuned to your well’s specific needs.
