With Tuned Cementing Solutions™ cementing systems, Halliburton has created a set of innovative fit-for-purpose solutions with the flexibility required to allow each system to be tuned specifically for a given set of wellbore conditions. *ExtendaCem cements* form one of these families of fit-for-purpose solutions.

With ExtendaCem cement you receive a conventional cement designed to create a lower cost cementing solution. This is accomplished by utilizing water extending additives compatible with wellbore conditions, generating slurries with higher yields.
