GraniteCem™ Cements
Designed to be harder than standard cements

With Tuned Cementing Solutions™ cementing systems, Halliburton has created a set of innovative fit-for-purpose solutions with the flexibility required to allow each system to be tuned specifically for a given set of wellbore conditions. GraniteCem cements form one of these families of fit-for-purpose solutions.

With GraniteCem cement you receive a conventional cementing solution designed to be harder than standard cements when well conditions require an exceptionally hard sheath.
