With Tuned Cementing Solutions™ systems, Halliburton has created a set of innovative fit-for-purpose solutions with the flexibility required to allow each system to be tuned specifically for a given set of wellbore conditions. AquaSeal cements form one of these families of fit-for-purpose solutions.

With AquaSeal cement you receive a foamed cementing solution custom designed to solve specific wellbore conformance problems using specially tuned systems. AquaSeal foamed cements can provide the additional benefits of increased compressibility and elasticity gained through the introduction of stable, well-dispersed small $N_2$ bubbles.
