CTSeal™ Cement
Designed to perform effectively under the unique conditions presented during coil tubing cementing

With Tuned Cementing Solutions™ cementing systems, Halliburton has created a set of innovative fit-for-purpose solutions with the flexibility required to allow each system to be tuned specifically for a given set of wellbore conditions. CTSeal cements form one of these families of fit for purpose solutions.

With CTSeal cements you receive a foamed cementing solution designed to perform effectively under the unique conditions presented during coil tubing cementing using specially tuned systems. CTSeal foamed cements can provide the additional benefits of increased compressibility and elasticity gained through the introduction of stable, well-dispersed small N₂ bubbles.
