With Tuned Cementing Solutions™ cementing systems, Halliburton has created a set of innovative fit-for-purpose solutions with the flexibility required to allow each system to be tuned specifically for a given set of wellbore conditions. SqueezeSeal cements form one of these families of fit-for-purpose solutions.

With SqueezeSeal cement you receive a foamed cementing solution designed to form an effective squeeze cement slurry in either cased or open hole intervals using specially tuned systems. SqueezeSeal cement can provide the additional benefits of increased compressibility, bridging, and elasticity gained through the introduction of stable, well-dispersed small N₂ bubbles.
