With Tuned Cementing Solutions™ cementing systems, Halliburton has created a set of innovative fit-for-purpose solutions with the flexibility required to allow each system to be tuned specifically for a given set of wellbore conditions. SwiftSeal cements form one of these families of fit-for-purpose solutions.

With SwiftSeal cement you receive a foamed cementing solution designed to gain compressive strength rapidly, once placed behind the casing. SwiftSeal cements can provide the additional benefits of increased compressibility, bridging, and elasticity gained through the introduction of stable, well-dispersed small N₂ bubbles.
