

**FOR IMMEDIATE RELEASE****Halliburton Announces Plans for New Integrated Completion Center in Louisiana**

NEW IBERIA, LOUISIANA – Jan. 14, 2014 – Halliburton (NYSE: HAL) announced today its plans for a new Integrated Completion Center located in New Iberia. This new facility will expand the company's resources and capabilities for deepwater completion tools while continuing to focus on service alignment, equipment maintenance, preparation and job execution for its Gulf of Mexico Area customers.

The facility, which will house more than 250 employees, will be located on 103 acres on Admiral Doyle Drive. It will include a 219,000-square-foot climate-controlled maintenance facility, a 30,000-square-foot administration building, an operations command center and several learning auditoriums for training. Halliburton is investing about \$45 million in land and building costs.

The company broke ground on the facility in spring of 2013, and it is scheduled for occupancy in the fourth quarter of 2014. The company will be consolidating some of its Gulf of Mexico operations from Houma and five locations in New Iberia, Broussard and Lafayette at the new center.

"As deep water operations grow, our new completion facility will provide increased capability and focus to meet evolving market requirements," said Charles Kendrick, vice president of Halliburton's Gulf of Mexico Area. "Providing our employees with the support, facilities and tools to deliver in the market is essential to our success. Halliburton is a global leader in completion technologies, and this facility continues to reflect our commitment to advance collaboration, integration, delivery models and solution services for our clients."

Halliburton employs approximately 3,500 people who live and work in Louisiana, including about 2,800 in the Gulf of Mexico Area. The company has 42 facilities in the state.

**About Halliburton**

Founded in 1919, Halliburton is one of the world's largest providers of products and services to the energy industry. With more than 75,000 employees, representing 140 nationalities in approximately 80 countries, the company serves the upstream oil and gas industry throughout the lifecycle of the reservoir – from locating hydrocarbons and managing geological data, to drilling and formation

evaluation, well construction and completion, and optimizing production through the life of the field. Visit the company's website at [www.halliburton.com](http://www.halliburton.com).
