

# MatchSet™ Setting Sleeve for Liner Hanger

## SETTING AND RELEASING FUNCTIONALITY FOR LINER HANGER SYSTEMS

### OVERVIEW

The MatchSet™ setting sleeve provides full functionality for the overall liner hanger assembly by incorporating a latching mechanism for the running tool during deployment and a profile for the retrievable packoff bushing to locate in. In addition, profiles are provided so that the running tool is able to torque through the system when rotation of the liner is required.

### APPLICATION

The MatchSet setting sleeve is a basic releasing sleeve used to carry the liner into the well. The sleeve is used in conjunction with liner hangers and the liner-top packer, including other threads and end connections as per the liner running tools.

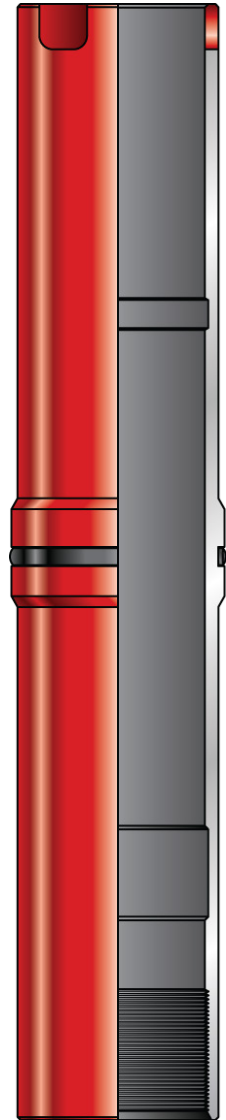

### FEATURES AND BENEFITS

- » Integral component to an overall liner hanger assembly
- » Premium bi-directional seal
- » Multiple purpose component
- » Available for mechanical and hydraulic release running tools
