

MatchSet™ Tieback Receptacle

HIGH INTEGRITY HONED SEALBORES IN VARYING LENGTHS

OVERVIEW

The MatchSet™ tieback receptacle provides a high integrity honed sealbore above the liner hanger which permits landing, sealing, and extending additional liner even further up the hole or to surface. It allows transferring set-down weight to activate the packer when a compression-set, liner-top packer is run integrated with the liner hanger assembly.

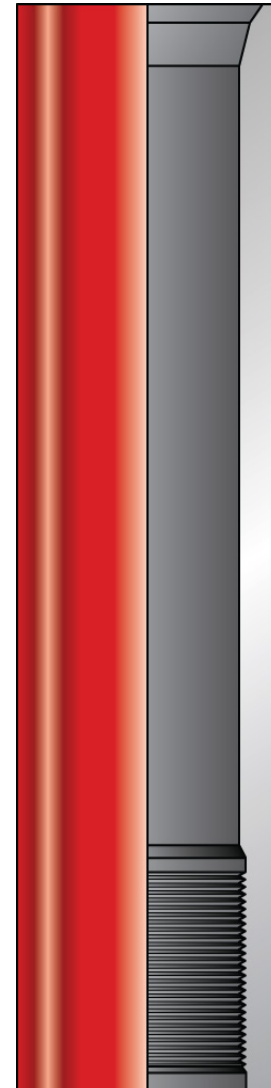

FEATURES AND BENEFITS

- » Designed for maximum pressure ratings
- » Machined within tight tolerances for reliable tieback sealing
- » Available in lengths from 10 ft (3 m) to 30 ft (9 m)
- » Allows liner to be tied back or extended uphole
- » Helps protect running tool assembly from debris while liner is run
- » Integral component when using a compression-set liner
