Drain Sub

SINGLE ACTIVATION BYPASS TOOL FOR A WIDE RANGE OF APPLICATIONS

OVERVIEW
The CleanWell® Drain Sub is designed to offer a simple and reliable one-time fluid bypass. The tool offers split flow capabilities or a full bypass with flow to the bit blocked, depending on the size of the activation ball used. The tool can be used as a standalone device or with other CleanWell tools, most commonly with the CleanWell® Vac Tech® downhole educator system to provide an option for conventional circulation after cleanup operations are complete. The tool can be activated by pumping down the activation ball or landing the ball and applying pressure in the event that some portion of the string below the tool has become blocked or flow is impeded.

FEATURES AND BENEFITS
» Simple, robust design
» High torque internal connection
» Small (2.25-in.) activation ball to block flow to bit and direct flow out of ports
» Large (2.75-in.) activation ball for split flow applications (ports and bit)
» Rated to 8,000 PSI differential pressure
» 5.31 in² port flow area
» High flow rate capabilities when open in all fluid types
