Legend™ LD-7350 Surfactant

OVERVIEW
Legend™ LD-7350 surfactant is a non-emulsifying surfactant specifically designed for medium and heavier oils.

APPLICATIONS
LD-7350 surfactant is used in hydraulic fracturing fluids. It is used as a non-emulsifier and wettability aid for improving flowback. LD-7350 surfactant is a green non-emulsifier which does not contain BTEX contaminants, 2-butoxyethanol (2-BE), or nonylphenol ethoxylates (NPEs).

Product Specifications

</tr>
</tbody>
</table>

COMPATIBILITIES
LD-7350 surfactant may cause defoaming which can affect energized or foamed fluid systems.

FEATURES/BENEFITS
» Water-based liquid surfactant non-emulsifier
» Improves flowback of hydraulic fracturing fluids and hydrocarbons
»Eliminates the use of many commonly scrutinized chemical components
»Compatible with all major aqueous-based hydraulic fracturing fluid systems
