CU-3™ Reducing Agent

CU-3™ reducing agent is commonly used in the Matrol™ and Matrol II™ processes to help reduce MA-15™ crosslinker and initiate crosslinking.

Applications

CU-3 reducing agent can be used at bottomhole temperatures (BHTs) between 70° and 225°F (21° and 107°C). Reducing-agent concentrations depend on specific formation conditions.

Benefits

CU-3 reducing agent has the following benefits:

- shelf-life of 36 months
- industrial-cleaning capabilities
