DCA™-22001 Foaming Agent

DCA™-22001 agent is a nonionic foaming agent that can help lower surface tension.

**Applications**

DCA-22001 foaming agent can help disperse some of the N- compounds that are only slightly soluble or dispersible in acid by themselves. As a foaming agent, DCA-22001 agent has a typical concentration of 5 gal/Mgal of inhibited acid. For surface tension reduction, 1.5 gal/Mgal of DCA-22001 agent is generally recommended.
